Dual US CA Citizenship

EDUCATION

Certificate Computers and Information Technology   McGill

GPA: 3.87/ 4.0
McGill University (2022)
Montreal, Quebec, H3A 2M7

B. Sc Biochemistry   Concordia UNIVERSITY

Concordia University (2012)

Montreal, Quebec H3G 1M8

PROGRAMMING SKILLS

Backend:

Strong Core **Java** (Testing, Design Patters OOP), **Spring Boot**,

Databases;

Microsoft **SQL** Server, MySQL, Postgres

Frontend:

React, HTML/CSS

Microservices:

REST, SOAP, Postman, Soap UI

Cloud Services:

AWS

Additional Technologies/Training:
JavaScript, Git/GitHub, **Agile/Scrum**, Eclipse, IntelliJ, Net Beans, Visual Studios, Android, Studio, Networking, Cyber Security

LANGUAGES

English (native speaker)
French (Intermediate)

CANDIDATE SUMMARY

- Years of prior experience in a deadline driven career, with a fast paced environment requiring teamwork, time management and adaptability.

- New graduate with a strong competency in core Java and SQL databases

- Active programmer prior to entering school, with the ability to learn new technologies quickly and independently overcome challenges.

- As part of my program I am eligible for la measure Subvention salariale, which will cover up to half of my salary for the first 5 months.

- Drive to build real world experience and to learn the current methodologies to become a reliable and indispensable resource for a growing IT company.

TECHNICAL EXPERIENCE

McGill's rigorous coursework gave me a solid foundation on the backend server side concepts and techniques required for the effective planning, design, and development of software applications and systems, internet technologies, applied computer knowledge, and networking. Centered on core Java programming and Spring Boot, proficientcy in all basic operations along with advanced concepts such as patterns, data structures, testing and CRUD operations were developted. Additioanlly, a solid grounding in database design (mySQL, SQL Server), networking, and system security was given. Multiple projects using Android Studio and web services (Microservices, REST, SOAP) using Spring Boot were completed and mastery of the core techniques aquired. Experiances was gained in Auzre and AWS cloud services. Full front and backend web development including javascript, HTML/CSS were also expanded upon. Since completing my studies, I have competed online courses in React to enable the design of frontend UIs for Spring Boot projects and courses on working in an Agile/Scrum environment to aid in a smooth transition into the modern work force.

CAREER EXPERIENCE

Vert La Bouche Catering (May 2014-Oct 2021) Owner/Director
Corporate references available upon request.

Managed a deadline driven business requiring extensive time management skills. Organized and managed staff members (teams of more than a dozen employees) through proven communication strategies that required strong people and interpersonal skills, planned and executed catered events ranging from 50-350 guests, with each event in a new location requiring problem solving and critical thinking skills to overcome the logistical difficulties of relocating and inserting an entire team to a new location at exactly the specified time to accomplish a complex task requiring extensive attention to detail from both management and staff. Negotiated contracts with corporate clients including Concordia UC, McGill UC, L'Oréal Canada. Generated procedures for safety, operations and regulation compliance.

Recent Work Available on Portfolio Website

- Project Expense Tracker with a React frontend making Restful API calls to a Spring Boot backend using a H2 database.

- Full Stack Personal SCRUM Board Implementing All CRUD Operation API Calls to a backend running on AWS Elastic Beanstalk.

- My Chat GPT-A mock Chat GPT Utilizing the OpenAI API

- Restaurant Online Order App Built On Android Studio.

- Mock Yelp Search App Utilizing the Yelp API.
